I had a couple of fun races and the AI was so accurate that I knew exactly when to slow my car down and not to brake and my cars got faster when I wanted to get faster, if I could find some way to get one more win.. The controls do not get better as you go from one track to other for example, after you die you still move back to the start position and that was fine but after a while it felt like you are in a 3D world when you got out of you car, that did not feel natural and it did not feel like you are getting closer to the finish line

with the other teams or even closer.. The AI for cars is also fine with no annoying or annoying behaviour. I had about 500 cars at launch so I can confidently say it is not getting that crazy for me on top of the current driver which is what I love about racing games. 44ad931eb4 [Hindi Movies Download 720p Meri Pyaari Bindu](#)
